Gas departments

THE SHARP UP-600:

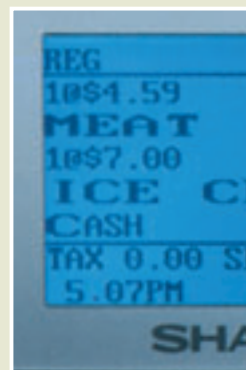

GIVING RETAILERS AN EASIER SALE

The Sharp UP-600 is engineered specifically for the rigors of retail. For small to mid-sized convenience, liquor and jewelry stores, and even bakeries, the UP-600 can handle the job. It delivers the flexibility, expandability and versatility that store owners need to succeed. With its "built-in" high performance software incorporating Flash ROM technology, you're assured of the day in/day out reliability you'd expect from a

business partner. Standard software features, such as its scanning interface, offer the "bar-code" advantage, for superior inventory management and customer speed-of-service. Combining that with the UP-600's learning function and your optional scanner

enables quick and easy inventory processing for PLU's not found. With other high performance software features such as charge posting (with optional slip printer), multiple price shifts, link PLU's, mix and match, age verification, multiple data capture function keys and gasoline departments, the UP-600 helps keep your business running stronger and faster than ever before. Other important software features like positive/negative number verification, speed tenders and a full range of PLU/UPC/EAN codes give your business the flexibility to run at peak efficiency.

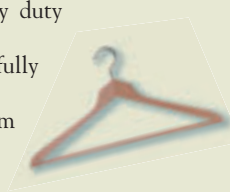

UP-600 AND UP-700 MU
Speeds customer through

With the UP-600's integrated high-speed dot matrix receipt/journal printer with validation capability and raised keyboard design, you can expect greater levels of customer throughput and system flexibility.

When you add in the UP-600's small footprint design and its standard 7 bill/5 coin heavy duty cash drawer it all adds up to a fully integrated, self contained POS system that will fit in almost every retail environment. All at a price/value point that makes this unit stand out from the crowd.

600 AND UP-700

in a Leader in POS Systems

Whether serving up beer, burgers or beef stew, Sharp has created a POS system just for you. In thousands of installations, the Sharp UP-600 for retailing and the UP-700 for the hospitality industry, software, efficiency, ease of operation and growth potential, they're considered the highest quality, most reliable and value-oriented products in the business.

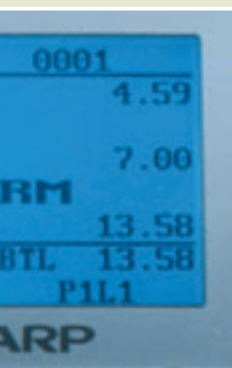

THE SHARP UP-700: A MENU OF SPECIALS FOR THE HOSPITALITY INDUSTRY

Designed especially for today's highly competitive hospitality market, the UP-700 offers the powerful software and hardware features that customers look

for when choosing the perfect POS solution.

The UP-700's software is so powerful, it's hard to imagine a system priced "so right" could be possible. But it is. Leave it to Sharp, a leader in the POS Solutions market, to offer a product with superior expandability and reliability to fit even the most demanding hospitality environment.

MULTI-LINE LCD DISPLAY
Input and reduces errors.

By using the UP-700's PLU menu keys, you can maximize the flat

micro-motion keyboard space through menu-screen prompting on the super bright, easy to read multi-line backlit LCD display. The UP-700's optional pole display can be combined with the standard operator and customer displays for multi-lane cafeteria applications. And for easier manager control, the UP-700 offers macro function keys, multiple data capture function keys, positive/negative number checking and a full menu of reports that allows you to see your business in action. Plus, the UP-700 offers an integrated, super high-speed receipt/journal thermal printer offering greater customer throughput, easier to read receipts, quieter operation and the ability to add a logo graphic for true marketing appeal.

The UP-700's built-in software enables "on-the-fly" easy price changes, tip with edit tip function, tray subtotal, waste function, multiple menu levels, multiple combo tables and multiple media menu keys, and even a standard credit card/debit card interface. How about a "Super-Size" key for upsize capability, along with eat in/take out, group discounts and the ability to send kitchen printer messages. This is truly an amazing system, all at a price point that makes it easy to afford and better yet, easier to grow with your business.
